Project Name – MSquare

FIRST 6 HOURS

Theme : The App which we are creating is basically a multipurpose app which implements many functionality like - :

a)Ordering Medicine

b)Calculating BMI

c)Depression Calculator

d)BP Guide

1.Brainstormed the ideas

2.Made Mockups

3.App theme and user interface

4.Added Explicit Intents inside the App

5.Made the Layouts for the Main Activity.

6.We implement the ordering feature which stores the input and calls a method an explicit gmail intent to order the medicine using method call.

Second 6 HOURS

1.We successfully implement the BMI Logic

2,We successfully implement the virtual BP Logic in BP Conditions.

Third 6 HOURS

1.We successfully implement the Depression Logic where the person will know if he is depressed or not.

2.We successfully add about us activity.

Fourth 6 HOURS

1.We will be debugging the app.

2.Applying Style to the Whole App.
